Index–Part I

Volume 32, Transactions of the American Foundrymen's Association

Abrasive wheel safety code..... 131
Acid electric furnace, Production of cast iron basic and..... 578
Address by the President, Annual..... 1
Advantages of uniform cost systems cited by U. S. Chamber of Commerce 51
Air furnace, Suitable coals for powdered coal to be used in an..... 659
Air furnace melting of white cast iron, Oxidation losses during..... 643
Air furnace operation When Using Powdered Coal..... 662
Air furnace slags, composition of..... 646
Alloy melting furnace designed to exclude gases from the metal, Aluminum 297
Alloy castings from sheet scrap, Aluminum..... 293
Alloy castings from sheet scrap, Discussion of aluminum.....
Alloy tensile test coupons and test results, Aluminum..... 300
Alloys, Bibliography of aluminum-silicon..... 343
Alloys, Copper-silicon..... 365
Alloys, Discussion, Alpax a new development of aluminum.....345, 348
Alloys, Mechanical properties of cast aluminum-silicon..... 316
Alloys, Pattern shrinkage of aluminum..... 355
Alloys, Properties of cast and rolled aluminum-silicon alloys compared with aluminum-copper and aluminum-zinc..... 340
Alloys, Resistance to corrosion of aluminum-silicon..... 356, 385
Alloys, Silicon-aluminum 312
Alloys, Tensile strength of sand cast aluminum-base..... 353
Alloys and heat treatment, Broadening the field for steel castings through the use of..... 730
Alpax, a new development of aluminum-silicon alloys..... 309
Alpax, a new development of aluminum-alloys, Discussion.....345, 348
Aluminum-alloy, Alpax, a new development of..... 309
Aluminum-alloy castings, Bibliography of welding..... 424
Aluminum-alloy castings by soldering and welding, Salvage and Reclamation of..... 395
Aluminum-alloy castings by welding, Casting losses and salvage of... 401
Aluminum-alloy castings by welding and soldering, Discussion..... 426
Aluminum-alloy castings from sheet scrap..... 293
Aluminum-alloy castings from sheet scrap, Discussion..... 303
Aluminum-alloy melting furnace designed to exclude gases from the metal 297
Aluminum-alloy in permanent molds, flow of liquid..... 275
Aluminum-alloy pistons, heat treatment of..... 263

Aluminum-alloy pistons in permanent molds, Discussion of production of 286
Aluminum-alloy piston in permanent molds, pouring temperatures 254
Aluminum-alloy pistons in permanent molds, Production of 226
Aluminum-alloy sand founding, casting losses 396
Aluminum-alloy tensile test coupon and test results 300
Aluminum-alloys, Discussion—Alpax, a new development of 345, 348
Aluminum-alloys, Foundry treatment and physical properties of silicon 350
Aluminum-alloys, Method of gating permanent molds for 244, 269
Aluminum-alloys, Pattern shrinkage of 355
Aluminum-alloys in permanent molds, effects of mold temperature in pouring 279
Aluminum base alloys, Tensile strength of sand cast 353
Aluminum-silicon alloy sand castings, Discussion,—foundry treatment and physical properties of 384, 387
Aluminum-silicon alloys 312
Aluminum-silicon alloys, Bibliography of 343
Aluminum-silicon alloys, Mechanical properties of cast 316
Aluminum-silicon alloys, Microstructure of 321
Aluminum-silicon alloys, Resistance to corrosion of 356, 385
Aluminum solders 415
Aluminum-zinc alloys, Properties of cast and rolled aluminum-silicon alloys compared with aluminum-copper and 340
American foundrymen, A world outlook for 11
American Foundrymen's Association, Joint committee activities of 9
American Foundrymen's Association, Scope of 2
American Foundrymen's Association, Work of committees of 6
American influence on European foundry practice 24
A.S.T.M. bars, Discussion—Notes on composition and structure of .. 536
A.S.T.M. bars, Notes on composition and structure of 510
Annealing costs 40
Annealing steel castings, The microscope as a control instrument in. 679
Annealing steel castings, spheroidizing of the cementite of the pearlitic constituent in 682
Annealing steel castings in an electric furnace 669
Annual address by the president 1
Apprentice thinks of apprenticeship, What a graduate 110
Apprentice training, Discussion 123
Apprentice's viewpoint, Apprenticeship from an 117
Apprenticeship, The employer's expectation of modern 97
Apprenticeship cooperation with schools 92
Apprenticeship from an apprentice's viewpoint 117
Apprenticeship program, The Milwaukee 91
Art bronze work 221

Bars, Effects of elements on strength of test..... 511
Bars, Notes on composition and structure of A.S.T.M..... 510
Bars, Size of cast iron test..... 533
Bars, Structure and shape of cast iron test..... 532
Basic and acid electric furnace production of cast iron..... 578
Bell founding, Discussion—modern..... 203
Bell founding, Historical notes on..... 176
Bell founding metallurgy..... 194
Bell founding, Modern..... 176
Bell founding molding practice..... 183
Bibliography, Aluminum silicon alloys..... 343
Bibliography, Welding aluminum-alloys castings 424
Bibliography of permanent mold references..... 284
Bibliography of references to articles on graphitization of white cast iron 623
Brass in Mexico, founding..... 214
Broadening the field for steel castings through the use of alloys and heat treatment..... 730
Bronze work, Art..... 221
Bureau of Standards, Soil corrosion investigation of..... 144

Calculating cost of defective castings..... 73
Carbon form in malleable cast iron, A study of factors affecting the. 617
Carbon steel castings, Recommended practice for heat treatment of.. 169
Carbon steels, Explanation of the solidification of medium..... 679
Carbon structure on physical properties of cast iron, effects of..... 522
Carburizers for synthetic foundry iron..... 585
Cast aluminum-silicon alloys, Mechanical properties of..... 316
Cast iron, Basic and acid electric furnace production of..... 578
Cast iron, Corrosion of.....138, 147, 163
Cast iron, Discussion, Report of committee on..... 442
Cast iron, The effect of chill on..... 542
Cast iron, Effects of carbon structure on physical properties of..... 522
Cast iron, Electric furnace gray..... 569
Cast iron, Fluidity possible in electric furnace..... 576
Cast iron, Influences on chill structure of..... 550
Cast iron, Relation between transverse and tensile strength of..... 521
Cast iron, A study of the factors affecting the carbon form in malleable 617
Cast iron from steel scrap, Making..... 572
Cast iron of the pouring temperature and rate of cooling, The Effect on the chill of..... 543
Cast iron structure, Microscopic examination of..... 530

Cast iron test bar, Size of..... 533
Cast iron test bars, Structure and shape of..... 532
Cast steel, Corrosion of.....138, 142, 163
Casting losses, aluminum-alloy sand..... 396
Castings, Bibliography, Welding aluminum-alloy..... 424
Castings, Calculating cost of defective..... 73
Castings, Methods of calculating costs of individual..... 56
Castings, Report of committee on non-ferrous..... 173
Castings from cupola melted metal, Copper..... 203
Castings from sheet scrap, Aluminum-alloy..... 293
Causes of failures in cost systems..... 43
Cementite of the pearlitic constituent in annealing steel castings, Spheroidizing of the..... 682
Centrifugal pipe process in a British foundry..... 22
Characteristics that chemical analysis fails to disclose in pig iron and castings 476
Charcoal iron furnace conditions compared with coke iron furnace conditions 476
Charcoal irons, Remelted..... 484
Charcoal pig iron, Properties of..... 481
Chemical analysis and transverse strength, Test bars compared by.... 471
Chemical analysis fails to disclose in pig iron and castings, Characteristics that 476
Chemical analysis fails to disclose in pig iron and castings, Discussion-Characteristics that 496
Chill of cast iron of the pouring temperature and rate of cooling, The effects on the..... 543
Chill on cast iron, The effects of..... 542
Chill rolls, A practical investigation of..... 555
Chill structure of cast iron, Influences on..... 550
Chill tests criticized..... 469
Classification of cost accounts..... 53
Cleaning room costs..... 40
Coal, Theory of powdered..... 661
Coal in malleable plant, Discussion on—Powdered..... 664
Coal to be used in an air furnace, Suitable coals for powdered..... 659
Coals for powdered coal to be used in an air furnace, Suitable..... 659
Coke iron furnace condition, Charcoal iron furnace conditions compared with 476
Coke irons, Remelted..... 484
Coke pig iron, Properties of..... 482
Color markings of patterns..... 88
Committee activities of the A. F. A., Joint..... 9
Committee on cast iron, Discussion—Report of..... 442

Committee on corrosion of ferrous metals, Report of..... 132
Committee on foundry costs, Report of..... 29
Committee on gray iron castings, Report of..... 427
Committee on heat treatment of ferrous metals, Report of..... 168
Committee on investigation of phosphorous and sulphur in steel, Report of representation on joint..... 771
Committee on malleable iron castings, Report of..... 668
Committee on non-ferrous castings, Report of..... 173
Committee on pattern equipment standards, Report of..... 87
Committee on refractories, Report of..... 129
Committee on specifications for steel castings, Report of..... 762
Committees, Work of American Foundrymen's Association..... 6
Co-operative research 3
Copper castings from cupola melted metal..... 205
Copper castings from cupola melted metal,—Discussion..... 210
Copper-aluminum and aluminum-zinc alloys, Properties of cast and rolled aluminum-silicon alloys compared with..... 340
Copper-silicon alloys 365
Core costs 39
Cores, Material for permanent molds and..... 24
Corrosion investigation of Bureau of Standards, Soil..... 144
Corrosion of aluminum-silicon alloys, Resistance to.....356, 385
Corrosion of cast iron.....138, 142, 163
Corrosion of cast steel.....138, 142, 163
Corrosion of ferrous metals, Discussion of..... 167
Corrosion of ferrous metals, Discussion of report of committee on... 140
Corrosion of ferrous metals, Report of committee on..... 132
Corrosion of malleable iron.....138, 142
Cost accounts, Classificatoin of..... 53
Cost data, on the performance of two two-ton electric steel furnaces, Notes, including conversion..... 704
Cost of defective castings, Calculating..... 73
Cost finding in a foundry..... 44
Cost finding in a foundry, Discussion..... 79
Cost finding methods, uniform..... 46
Cost summaries, Monthly..... 52
Cost system, uses of a..... 45
Cost system should furnish, Data a..... 34
Cost systems, Causes of failures in..... 43
Cost systems cited by U. S. Chamber of Commerce, Advantages of uniform 51
Costs, Annealing 40
Costs, Cleaning room 40
Costs, Core 39

Costs, Divisions of foundry..... 37
Costs, Graphic computation of..... 78
Costs, Overhead..... 67
Costs, Pattern, sand and flask..... 41
Costs, Principles of foundry..... 30
Costs, Report of committee on foundry..... 29
Costs in a foundry, Departmental..... 32
Costs of cleaning operations in a steel foundry finishing department.. 753
Costs of individual castings, Methods of calculating..... 56
Cupola, Discussion, melting steel in a..... 463
Cupola, Melting steel in a..... 448
Cupola gases..... 455
Cupola melted metal, Copper castings from..... 205
Cupola melted metal, Discussion, copper castings from..... 210

Data a cost system should furnish..... 34
Dendritic and whorl formation of graphite structure of cast iron.... 525
Departmental costs in a foundry..... 32
Discussion,—Alpax a new development of aluminum alloys.....345, 348
Discussion,—Aluminum-alloy castings from sheet scrap..... 303
Discussion,—Apprentice training..... 123
Discussion,—Broadening the field for steel castings..... 744
Discussion,—Characteristics that chemical analyses fail to disclose in pig iron and castings..... 496
Discussion,—Copper castings from cupola melted metal..... 210
Discussion,—Corrosion of ferrous metals..... 167
Discussion,—Cost finding in a foundry..... 79
Discussion,—Electric furnace cast iron..... 592
Discussion,—Foundry treatment and physical properties of silicon-aluminum sand castings.....384, 387
Discussion,—Heat treatment of steel valve castings in an electric furnace..... 677
Discussion,—Mechanism of graphitization of white cast iron..... 624
Discussion,—Melting steel in a cupola..... 463
Discussion,—Microscope as a control instrument in annealing steel castings..... 690
Discussion,—Modern bell founding..... 203
Discussion,—Notes on composition and structure of A.S.T.M. bars.. 536
Discussion,—Notes on the overall performance of two two-ton electric furnaces..... 724
Discussion,—Organization and practice in a steel foundry finishing department..... 756
Discussion,—Powdered coal in a malleable plant..... 664

Discussion,—Production of aluminum-alloy pistons in permanent molds 286
Discussion,—Report of committee on cast iron..... 442
Discussion,—Report of committee on corrosion of ferrous metals.... 140
Discussion,—Salvage of aluminum alloy castings by welding and soldering 426
Discussion,—Testing iron to control the properties of castings..... 472
Discussion,—X-Rays in the foundry..... 702
Divisions of foundry costs..... 37

Effects of carbon structure on physical properties of cast iron..... 522
Effects of elements on strength of test bars..... 511
Electric furnace, Discussion,—Heat treatment of steel valve castings in air..... 677
Electric furnace, Electrodes for..... 722
Electric furnace, Heat treatment of steel valve castings in an..... 669
Electric furnace, Synthetic foundry iron in an..... 583
Electric furnace cast iron, Discussion..... 592
Electric furnace cast iron, Fluidity possible in..... 576
Electric furnace gray iron..... 569
Electric furnace in the pipe foundry, The..... 565
Electric furnace production of cast iron, Basic and acid..... 578
Electric steel furnace operation, Refractories costs of..... 721
Electric steel furnace power costs..... 715
Electric steel furnaces, Methods of operating..... 708
Electric steel furnaces, Notes, including conversion cost data, on the performance of two two-ton..... 704
Electrodes for electric furnaces..... 722
Employers' expectation of modern apprenticeship, The..... 97
European associations, Foundry papers exchanged with..... 28
European foundry exhibitions 16
European foundry practice, American influence on..... 24
European foundry progress..... 20
Eutectoid, Structural evidence of iron-carbon..... 607
Exhibitions, European foundry..... 16

Ferrous metals, Discussion of corrosion of..... 167
Ferrous metals, Discussion of report of committee on corrosion of.. 140
Ferrous metals, Report of committee on corrosion of..... 132
Ferrous metals, Report of committee on heat treatment of..... 168
Flask costs, Pattern, sand and..... 41
Fluidity possible in electric furnace cast iron..... 576

Heywood, C. W., Organization and Practice in a Steel Foundry Finishing Department 746

Jennings, T. F., Making Copper Castings from Cupola Melted Metal. 205
Johnson, J. B., Discussion—Aluminum-Alloy Castings from Sheet Scrap 308
Jominy, W. E., Characteristics that Chemical Analysis Fails ti Disclose in Pig Iron and Castings..... 476

Knerr, C., Aluminum-Alloy Castings from Sheet Scrap..... 293
Lambert, Wesley, and Hall, G., Modern Bell Founding..... 176
Logan, K. H., Soil Corrosion Investigation..... 144
Lowry, E. J., The Effect of Chill on Cast Iron..... 542
Discussion—Characteristics that Chemical Analysis Fails to Disclose in Pig Iron and Castings..... 476

MacKenzie, J. T., The Electric Furnace in the Pipe Foundry..... 565
Malcolm, V. T., with Sproat, A., Heat Treatment of Steel Valve Casting in the Electric Furnace..... 669
May, Howell, B., Departmental Costs in the Foundry..... 32
Meneely, C., Discussion—Modern Bell Founding..... 203
Miller, H. H., The Founding of Brass in Mexico..... 214

Quinn, T. S., Notes, including Conversion Cost Data, on the Performance of 2 Two-ton Electric Steel Furnaces..... 704

Romanoff, Wm. and Wolf, F. L., Powdered Coal in a Malleable Casting Plant 658

St. John, Ancel, X-rays in the Foundry..... 693
Sayre, M. F. and Basch, D., Foundry Treatment and Physical Properties of Silicon-Aluminum Sand Castings..... 350
Schwartz, H. A., Oxidation Losses During Air Furnace Melting of White Cast Iron..... 643
Discussion—Characteristics That Chemical Analysis Fails to Disclose in Pig Iron and Castings..... 501
Discussion—The Mechanician of Graphitization of White Cast Iron and Its Application to the Malleablizing Process..... 624
Discussion—Report of Committee on Corrosion..... 142

Shaw, John, Discussion—Report of Committee on Grey Iron Castings 442
Discussion—Notes on Composition and Structure of A. S. T. M. Bar 536
Sims, C. E., Williams, C. E. and Worsöe, K. W. B., Synthetic Foundry Iron 583
Sproat, A. and Malcolm V. T., Heat Treatment of Steel Valve Casting in the Electric Furnace..... 669
Stein, H. J. and Harper, J. F., The Microscope as a Control Instrument in the Annealing of Steel Castings..... 679
Strauss, Jerome, Discussion—Aluminum Alloy Castings from Sheet Scrap 305
Discussion—Foundry Treatment and Physical Properties of Silicon-Aluminum Sand Castings..... 384

Towne, J. D., Discussion—Organization and Practice in a Steel Foundry Finishing Department..... 756

Williams, C. E., Sims, C. E. and Worsöe, K. W. B., Synthetic Foundry Iron 583
Willson, E. L., Electric Furnace Grey Iron..... 569
Wolf, F. L. and Romanoff, Wm., Powdered Coal in a Malleable Casting Plant 658
Worsöe, K. W. B., Williams, C. E. and Sims, C. E., Synthetic Foundry Iron 583
Young, H. J., Discussion—Characteristics That Chemical Analysis Fails to Disclose in Pig Iron and Castings..... 503
